

MANISH KUMAR

FULL STACK .NET DEVELOPER

Bangalore, India — +91-8340793708 — manish.kumar.explore@gmail.com — LinkedIn

SUMMARY

Highly skilled and motivated **.NET Developer** with **4+ years of experience** in designing and developing scalable web applications. Strong expertise in **C#, .NET Core, ASP.NET Core, Entity Framework Core, Web API, and MS SQL Server**. Experienced in **RESTful API development, database management, Stored Procedures, LINQ, and backend development**. Strong understanding of **software development lifecycle, debugging, performance optimization, and Agile methodologies**. Passionate about learning emerging technologies and contributing effectively to high-performing development teams.

TECHNICAL SKILLS

Programming Languages	C#, JavaScript, OOPS
Frameworks	ASP.NET Core, ASP.NET MVC, Web API, Razor, Blazor, React.js, Web Forms
Database	MS SQL Server, Oracle
ORM / Data Access	Entity Framework, Entity Framework Core, ADO.NET, Dapper, LINQ
API / Security	RESTful APIs, Web API, JWT Token, Swagger, Postman
Cloud / DevOps	Azure, Azure DevOps, Docker, Azure Container Apps, Azure Functions, Application Insights, APIM
Frontend	HTML, CSS, Bootstrap, JavaScript, React.js
Version Control	Git, GitHub
Methodology	Agile Methodology

PROFESSIONAL EXPERIENCE

TECHNOFORTE SOFTWARE PVT LTD

Sep 2025 – July 2026

Software Engineer — Bangalore

- Developed and maintained scalable payroll applications using **.NET Core, C#, and React.js**.
- Designed and developed RESTful APIs for payroll processing, employee data management, and business workflows.
- Worked with **SQL Server, Oracle, Entity Framework, and Entity Framework Core** for database operations and data access.
- Implemented CI/CD pipelines using **Azure DevOps** to automate application build and deployment processes.
- Containerized and deployed applications using **Docker** and **Azure Container Apps**.
- Integrated **Azure Functions** for background processing and asynchronous business operations.
- Monitored application performance using **Azure Application Insights** and managed APIs through **Azure API Management (APIM)**.
- Troubleshoot production issues, performed debugging, and implemented performance optimization to improve application reliability.

Inube Software Solution Pvt Ltd

Nov 2024 – Dec 2024

Software Engineer — Bangalore

- Developed and maintained web applications using **ASP.NET, ASP.NET MVC, C#, JavaScript, ADO.NET, and MS SQL Server**.
- Developed and implemented application features following **Agile methodology** and software development best practices.
- Performed database operations, SQL queries, application debugging, maintenance, and troubleshooting to ensure application reliability.

Quanted Technologies Pvt Ltd

Jun 2022 – Oct 2024

Software Engineer — Bangalore

- Developed and maintained web applications using **C#, ASP.NET Core, Entity Framework, Blazor, JavaScript, SQL Server, and Web API**.
- Designed and developed RESTful APIs for efficient frontend-backend communication and business functionality.

- Worked with **MS SQL Server** for **database design**, **SQL queries**, data management, and application data operations.
- Used **Swagger** and **Postman** for **API testing**, validation, and debugging.
- Followed **Agile methodology** and used **Git/GitHub** for **version control**, code management, and collaborative development.

PROJECT HIGHLIGHTS

1. DocOnline – Healthcare Appointment Application

Project Overview:

DocOnline is a **Healthcare Appointment Application** designed for **medical appointment scheduling**. The application enables patients to **view doctor profiles**, check **doctor availability**, and **book appointments** with healthcare providers.

Team Size: 5 Members

Technology: C#, ASP.NET Core, ASP.NET Core MVC, JavaScript, Blazor, SQL Server, Web API

Tools: Visual Studio, VS Code, Swagger, MS SQL Server

Responsibilities:

- Developed and maintained application features using **ASP.NET Core MVC**, **C#**, and **Blazor**.
- Developed, integrated, and consumed **RESTful Web APIs** for communication between frontend and backend services.
- Worked with **SQL Server** for **database operations**, data management, and application data processing.
- Tested and validated **APIs** using **Swagger** and performed debugging during development.
- Implemented healthcare appointment workflows including **doctor availability**, **appointment scheduling**, and **patient booking**.

2. Agri Nxt – Agriculture Application

Project Overview:

Agri Nxt is an **Agriculture Application** developed to support agriculture-related business operations and application workflows. The application was developed using **ASP.NET**, **ASP.NET MVC**, **C#**, **JavaScript**, **ADO.NET**, and **MS SQL Server**.

Team Size: 7 Members

Technology: C, ASP.NET, ASP.NET MVC, JavaScript, ADO.NET, MS SQL Server

Tools: Visual Studio, VS Code, Swagger, MS SQL Server

Process: Agile Methodology

Responsibilities:

- Developed and maintained application features using **ASP.NET**, **ASP.NET MVC**, and **C#**.
- Worked with **ADO.NET** and **MS SQL Server** for **database operations**, data access, and SQL queries.
- Developed and integrated **Web APIs** for application functionality and frontend-backend communication.
- Used **Swagger** for **API testing and validation** during development.
- Followed **Agile methodology** and collaborated with team members throughout the **software development lifecycle**.

3. HRMS – Salary Processing Payroll Management System

Client: Toyota Kirloskar Motor

Team Size: 2 Members

Project Overview:

HRMS is a **Human Resource Management System** developed to automate **employee management**, **salary processing**, **payroll management**, and HR-related business workflows.

Technology: C#, ASP.NET Core, ASP.NET Core Web API, React.js, JavaScript, ADO.NET, Oracle

Tools / DevOps: Visual Studio, VS Code, Swagger, Azure DevOps, Docker, Azure Container Apps, Azure Functions, Application Insights, Azure API Management (APIM)

Responsibilities:

- Developed and maintained HRMS payroll applications using **C#**, **ASP.NET Core**, and **React.js**.
- Designed and developed **RESTful Web APIs** for **payroll processing**, **salary calculation**, and **employee data management**.
- Worked with **Oracle**, **ADO.NET**, and database operations for efficient **data access** and business processing.
- Implemented **CI/CD pipelines** using **Azure DevOps** to automate application build, deployment, and release processes.
- Containerized and deployed applications using **Docker** and **Azure Container Apps**.

- Integrated **Azure Functions** for **background processing** and automated business operations.
- **Monitored application performance and health** using **Azure Application Insights**.
- Managed and configured APIs using **Azure API Management (APIM)**.
- **Troubleshoot production issues**, performed **debugging**, and implemented **performance optimization** to improve application reliability.

EDUCATION

Bachelor of Computer Application (BCA)

Mahatma Gandhi Kashi Vidyapeeth, School of Management Sciences, Varanasi
